

IMAGE4ALL

Energy Efficient Future

We
are
the
Future

A person wearing a red jacket, blue pants, and a backpack is climbing a snowy mountain slope. The sun is low on the horizon, creating a warm, golden glow. The person is using ski poles and is moving up the slope, leaving a trail of snow behind them. The sky is filled with soft, wispy clouds.

About Us

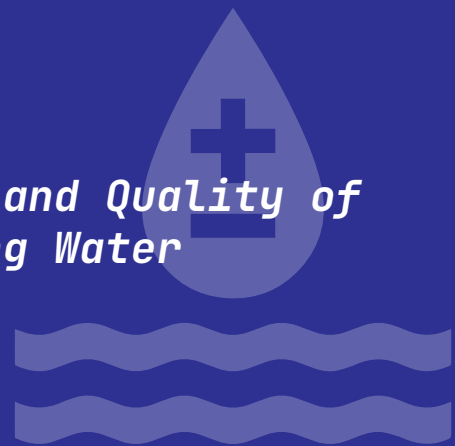

We are an Engineering company dedicated to the diagnosis, development and integrated implementation of Energy solutions.

Image4All is an Engineering company dedicated to the diagnosis, development and integrated implementation of:

*Auditing
and Energy
Efficiency*

*Safety and Quality of
Drinking Water*

*Electric
Mobility*

About

Us

We optimize energy use, increasing comfort and quality of life and improving businesses profitability and sustainability.

We develop projects in all matters of public procurement regarding the use of energy in favour of more sustainable and "smart" cities. With a special focus on supporting municipalities and the industrial and services sectors, Image4All adds value both to new investments and to the improvement of existing facilities.

Despite being a recent company, we have amassed a vast knowledge and know-how based on the accumulated experience of our staff, as well as of our external collaborators, partners and suppliers.

Our services are performed without any kind of commercial, financial or additional

pressure, which may influence the appropriate technical assessment of each situation.

Our intuitive analysis and strategic design and management skills adjusted to the current economic reality convey the conviction of being capable to answer the opportunities and challenges that the areas of Energy Efficiency pose to our community.

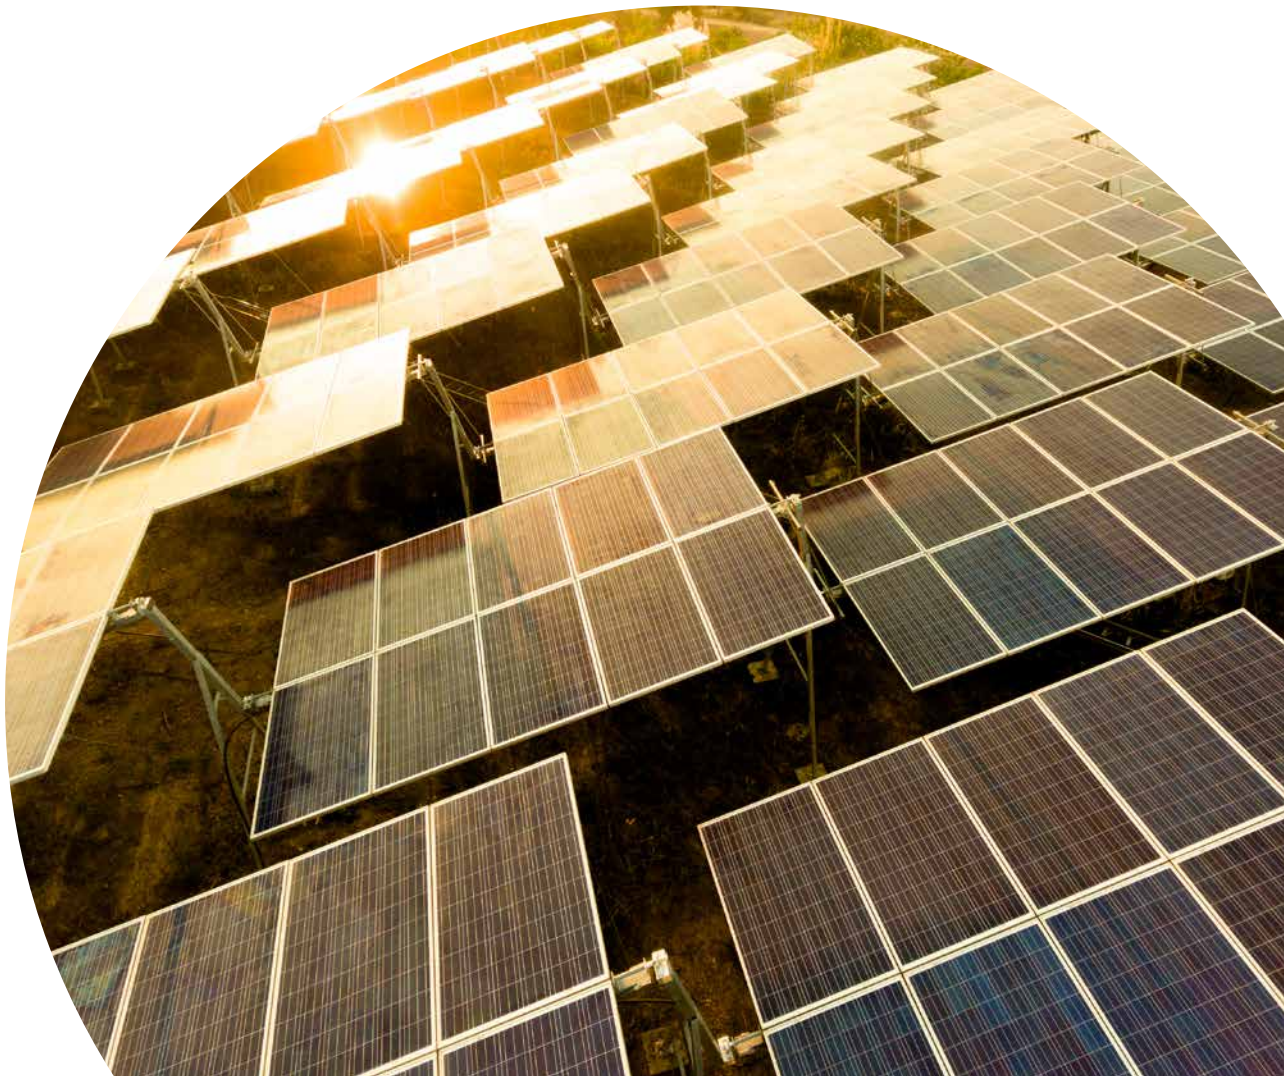

Image4All guarantees the sustainable creation of value for its stakeholders.

Missi

on

We create engineering solutions for energy efficiency needs, alternative energies, electrical and hydraulic installations, HVAC, electric mobility and water quality, through original processes of identification, analysis and evaluation of performance points. Our technically competent and committed team answers our clients' expectations in diverse areas of intervention, offering an integrated and high-quality service and carrying out a close and transparent monitoring of the projects. We contribute to a more sustainable and energy efficient country.

Starting from an intuitive analysis and strategic formulation associated with management skills adapted to the current economic reality, we created an organization capable of responding to current opportunities and challenges with the solutions Energy Efficiency offers to both society and companies alike.

Vision

Values

- Honesty, transparency and closeness in the relationship with our Client.
- Responsibility and commitment towards identified needs.
- Agility, dynamism and speed of response and intervention.
- Know-how, technical capacity and competence of a complete team that allows a broad answer at various levels.
- Security, credibility and stability of the presented solutions.

Services

We create engineering solutions for energy efficiency, renewable energies, electrical, HVAC and hydraulic installations, mobility and water quality needs, through original processes of identification, analysis and evaluation of performance points. Our technically competent and committed team answers the customers' expectations

in diverse areas of intervention, offering an integrated and high quality service and carrying out a close and transparent monitoring of projects. We contribute to a more sustainable and energy efficient country.

Services

Ener

gy

For the Public and Private sectors, we study, design and implement integrated energy efficiency measures aimed at reducing energy consumption, with particular emphasis on photovoltaic systems for self-consumption. In addition, we support companies in applying for community funds in this area.

What we do in the area of Energy Efficiency?

> SERVICES

- Energy Audit
- Energetic certification
- Specialty Projects (thermal and acoustic)
- Applications to EU financing in this area

> IMPLEMENTATION OF SOLUTIONS (PUBLIC AND PRIVATE CONTRACTS)

- Indoor and outdoor lighting
- HVAC
- Heating systems (gas or pellet boilers)
- Pumping systems
- Window replacement
- Renewable Energies (Project and Execution)
 - Photovoltaic Solar (with or without batteries)
 - Solar Thermal for DHW

> BUILDING MAINTENANCE

- Building Installation and Maintenance Technician (TIM III)
- Electrical Installation Technician (TREIE)

Efficiency

Services

Electric

Vehicle

Charging

Points

Sale of charging points for electric vehicles in the Public and Private space. Image4All participates competitively in this market as an CPO (Charging Point Operator), under license n° 34, being able to install, operate and maintain equipment anywhere in the country, connected or not to the Mobe network.

In a complementary activity, we have developed solutions that concern the management, quality and safety of drinking water. The importance of the PSA - Water Safety Plan in all facilities where there is public water consumption is a legal and fundamental obligation to offer a quality service.

Safety and Quality of Drinking Water Services
